TRAINING COURSE ON

QUALITATIVE RESEARCH METHODOLOGY IN ENVIRONMENTAL HEALTH

Qualitative method is used to understand people's beliefs, experiences, attitudes, behavior, and interactions. It helps to outline the requirements of a community, determine the association among multiple factors, and also to compare outcomes qualitatively. Qualitative approaches are vital in environmental health research as they facilitate the development of community narratives that amplify individual voices and provide a thorough and detailed portrayal of the community.

RATIONALE

The present training course aims to provide hands-on training to the students in the field of public health research and develop a better understanding among them. The training will target the theoretical aspects along with the practical scenarios applied over the various qualitative research topics focusing on environmental health along with the qualitative data analysis aspects.

LEARNING OUTCOMES

- Qualitative research methods overview
- Qualitative data collection methods
- Trustworthiness in qualitative research
- Qualitative approaches and Data management
- Qualitative data analysis process

ELIGIBILITY

Masters' / doctoral students currently* enrolled in Public Health / Community Medicine / Pediatrics / Population Studies / Developmental Studies/Environmental science /Environmental health/Psychiatry/Psychology
